

ANNEX J - Research sites and institutions visited

Data collection was carried out at the national level, with national level stakeholders, and at sub-national level in Skopje and Bitola. The selection included areas where there was a high prevalence of residential care facilities and social service providers, including family-type alternative services (foster and small groups), and various types of social services for vulnerable families with children.

Table 1: Institutions visited in each of the locations

Skopje
Ministry of Labour and Social Protection
Institute for Social Activities
SOS Children's Village
Support Center for Foster Care
Former Institution "Topansko Polje"
